Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of a device invention shown in Fig. 2 in the reply filed on 4/19/2004 is acknowledged.

Claims 5, 11 directed to a laser vapor producing means are non-elected species.

Claims 20-23 directed to methods of using a fluid micro-jet device to modulate a tissue/cut a tissue/introduce fluid to a cell/manipulate a blood clot, which are distinct from the invention as recited in the elected claims 1-4, 6-10, 12-19. The methods as claimed are distinct inventions and therefore are withdrawn from further examination as non-elected inventions.

Claim Objections

Claims 8 and 13 are objected to because of the following informalities: "micronozzel" in line3, claim 8 and line 3, claim 13 are misspelled. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3731

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-10, 11-19 are rejected under 35 U.S.C. 102(e) as being anticipated by MISUMI (6,244,693).

As to claims 1-4, 6-10 and 11-17, MISUMI (Fig. 1-2; col. lines 53 to col. 3, line 12) discloses a device comprising micro-fluid chambers/compartments (defined by top component 16, bottom component 16, side components 14 and back components 18), vapor producing means/heaters/electrodes 3, micronozzles 2, vapor bubbles 8. Notice that the maximum length of bubbles 8 shown in Fig. 5 is about 220 microns (col. 6, lines 3-7) therefore and the size of the fluid chambers and the arrangement of electrodes/heaters must be quite within the ranges as recited in the claims.

As to claims 18-19, MISUMI inherently discloses a method of using a micro-jet device comprising a vapor producing means as recited in the claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 703-306-3420. The examiner can normally be reached on Monday-Thursday.
